US ARMY D356031

OIF Battalion Numbers (Part 2)

This set accurately captures one of the frequently seen fonts used by the US Army during the OIF campaign. Mostly used to represent battalion numbers, the usage of these digits span across many vehicle types ranging from M1 Abrams, M2 Bradleys, Humvees, M109A6 Paladins, M113s, to HEMTT oil tankers. However, modellers are to check with their references if possible before using these because not all units used the same type of fonts.

1234567890

 Plenty of back stars that are often missed out by a number of kits.
