(5) The 24 July attack on the Ise was a result of a series of errors. The main deck was completely destroyed. The main deck was completely destroyed. The main deck was completely destroyed.

Both ships were raised from the bay of Imperial warships on 22 November 1945. They were repaired and broken up by the American Navy in the bay of the former Bay 11, to adapt the rapidly changing requirements. The Ise was broken up in 1947, the Hyūga in 1948 and the Mogami in 1949. The Ise was the only ship of the Ise class to be raised.
