**P-51D Mustang - Tamiya**  
 seatbelts + wooden floor + dinghy

This set contains printed and photoetched parts. Choose appropriate shade of belt and trim on dotted line using very sharp knife. Trim to required length according to type of seatbelt. Using finger munch into little ball. Flatten out and thread through photoetched parts. Glue using dispersive glue, do not use chemical glue that etches plastic. When applying, look and photos of interior of individual machines. After glued and shaped, paint with matt varnish.

**HGW DECAL - INSTRUCTIONS (transparent)**  
 Pasted/brushed, puffed and polished model paint by base white (it is suitable to polish also this coloured layer before applying wooden decal). The decals are transparent, so it is necessary to apply base colour. It is possible to mark off single panels by using different shades of base colour (white, of white, yellow). Then cut required shape of panel (with 2 mm overlap) and apply as same as ordinary decal (use Mr. Mark Setter, Mr. Mark Soffer). After these processes cut protruded wooden decal with very sharp knife.

**WARNING!**

This set contains small and sharp parts. Work carefully in a ventilated and well-lit room. Safety glasses are recommended. This product is not suitable for children 14 years or younger.
