- Dunkel Gelb.
- Rotbraun.
- Olivegrün.

The area probably pointed on a metal or wooden plate attached to the tracks.

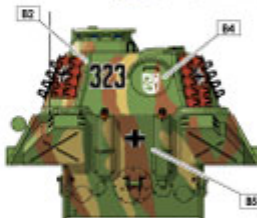

The turret number could possibly also be 322.

### B Panther Ausf G - late production

10. SS-Panzer Division Frundsberg, Cottbus area Germany in April 1945.

Most of the turret sides covered with a camouflage net so it's hard to see details, but it looks like this tank had spare tracks attached to the turret sides. If any other markings were used is impossible to see.
