USAF, USN & USMC PAINT SET (MODERN GREYS)

Standard camouflage colours of US aircraft from late 1970s to present

In late 1970s US air forces started to introduce new standard of aircraft camouflage (often referred to as "Tactical Paint Scheme") formed from different shades of grey. In USAF, appeared first on F-15s and F-16s (and F-4s) in Desert 3 colour scheme. In USN, two-colour scheme was more effective in desert conditions. Fleet of new aircraft (USN and USMC) were TPS from 1980 (A-6s and F/A-18s) and 1981 (remaining types). Introduction of F-35s (and new Hove Glass 5 coat on F-16s) brought new colour FS50170 into line.
