The book **LSSAH in PHOTOS 1933-1945** presents in many photographs the best known combat unit of the Waffen-SS. It also includes a brief text history of the LSSAH. All unit insignia utilized during WW II are shown. The photographs in the book are either previously unpublished or not well-known. There are many photographs of the unit's first commander, Sepp Dietrich, and fighting soldiers of lower ranks. The book contains 168 pages, 313 photographs and 23 insignia.

The reader will find a lot of information about the actions of the LSSAH in the book **SS-Panzerkorps in the battle for Kharkow 01-03.1943** (the first from the series **History of the Waffen SS**) and in both volumes from the series **Technical and Operational History: Tiger 1942-1943 and Tiger 1944-1945**.
