USAF, USN & USMC PAINT SET (MODERN GREYS)

Standard camouflage colours of US aircraft since late 1970s

In late 1970s US air forces started to introduce new standard of aircraft camouflage (often referred to as "Tactical Paint Scheme") based from different shades of grey. In USAF it appeared first on F-15s and F-16s (and F-4s as H&H One came), and on A-10s but only after Operation Desert Storm. Marines of USMC adopted TPS (first in three, later in two-colour version) also only after ODS proved previous camo not effective in desert conditions. Rest of naval aircraft (USN and USMC) were TPS from 1980 (A-6s and F/A-18s) and 1981 (remaining types). Introduction of TPS (and new paint codes) by F-16s brought new colour
