A row of M1A2 Bradleys with 5th Squadron, 4th Cavalry Regiment, 2nd Armored Brigade Combat Team, 1st Infantry Division, at the assembly area. Note the green-vehicle markings usually painted by personnel on the back cover.

Big red dots (in weathering on the top of the Bradley). The vehicle is painted green, but the base coat is covered with enough dirt that it appears to be painted tan. The main mounting doors are tan along the hull, and the door appears to sit up on the back of the turret.

A M1A2 Bradley with 5th Squadron, 4th Cavalry Regiment, 2nd Armored Brigade Combat Team, 1st Infantry Division, Fort Riley, Kansas, and an AH-64 Apache helicopter with 1st Battalion, 3rd Aviation Regiment, 12th Combat Aviation Brigade, Fort Bragg, during a combined arms live fire exercise at Grafenwöhr Training Area, Germany, Mar 24, 2018. U.S. Army photo by Staff Sgt. Thomas Matthews / 22nd Mobile Public Affairs Detachment.

A nearby Cav soldier is taking a quick break before moving out to a new mission. He wears the OCP pants with a green coat and the vehicle personnel group and.

A close-up of the upper hull and turret of a M2A3 Bradley, as shown previously. The turret thermal viewer is just to the left of the driver's hatch. The Star Filler "hockey puck" antenna is mounted above the Improved Bradley Acquisition System (IBAS) processor cover.

Notice the Improved Bradley Acquisition System (IBAS) processor cover for target acquisition and other essential functions.

Details on the M2A3

NOTE: The M2A3 submachine gun is shown in detail above, along with the turret-mounted smoke grenade launchers. RIGHT: The new and improved 3/32" Bradley track, in this instance is very worn. Note the rubber track pads have worn off in chunks. The rubber is nearly even with the metal track.

BELOW: Two shackles on the lower front of the Bradley. A set is on the left and the right.

JadarHobby

Another side turret view, clearly visible is the supplementary turret armor, and a side view of the M207 Smoke Grenade Launchers. The open space, below the side turret armor where the spare 7.62mm stumps are stored from.

Page 54

NOTE 16 MODEL LEFT: Cannon Identification Panel, snapped to the side of the left side of the turret.

NOTE 16 MODEL RIGHT: Rubber brush guard for 7.62mm water can storage.

NOTE 17 MODEL: Different aspects of the right-side headlight cluster and protective panel.
