Polecamy!

★One of the marking options in the kit is for the VF-213 "Black Lions" Wing Commander's aircraft.

★This image shows the kit assembled as an F-14D of the famed VF-101 "Grim Reapers."

★Here is a picture of the kit assembled as an F-14D from VF-2, the "Bounty Hunters."

★Single part depictions of F110-GE-400 engine nozzles for superb realism and fuss-free assembly.

★The model features faithful depictions of the vertical stabilizer stiffener plates.

★F-14D-specific features at the front include the dual chin pods and gun gas purge vents.

★Cockpit has depictions of F-14D ejection seats, and crew in newer uniforms. Canopy is openable.

★F-14D cockpit features such as updated forward and aft displays are accurately captured.

★Separate parts are included to depict the fuel probe on the right of the nose extended or retracted.

★Wing moves smoothly between 20° (take-off, landing) and 75° (parked), thanks to two gear sections.

★This image gives a closer look at just how the gear sections for the wing mesh together.

★2 sets of parts depict wing sealing plates and air bags in fully swept and forward positions.

★Sealing plate and air bag parts are marked on their reverse to help avoid confusion when attaching.

★Recreations of updated AIM-9L/M, AIM-7F and AIM-54C missiles, plus GBU-12 and GBU-16 guided bombs.

★Also included are depictions of GBU-31 JDAM, AN/ALQ-167 jamming pod, AN/AAQ-25 LANTIRN, and TARPS.

★Model can be assembled with ordnance for Std.CAP, bombing, reconnaissance missions and more!

★TARPS reconnaissance pod features a separate recreation of the internal camera, for max realism.

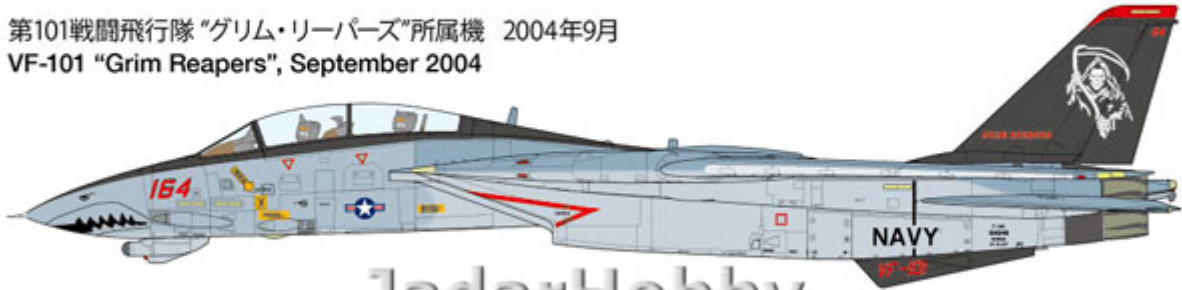

★Sidewinder launcher also features a different design to that of its counterpart on the F-14A.
