**US ARMY D356022 (Part 1) Battleboard Alphanumeric**

Accurately recreated, this set of alphanumerics is used on the battleboards of a number of M1A2 SEP Abrams and M2A2 Bradleys that served in the OIF campaign. While very similar in appearance, there were actually two variations of the same font used as illustrated below. For accuracy sake, modellers are advised to check with their references if possible before using these to see if the broad or narrow version was used. Also, not all units used the same type of fonts.
