### Tamiya 87180 - Primer for CA Cement (PP/PE/POM)

Podkład pod kleje cyjanoakrylowe.

Zawartość opakowania:

- Podkład z pędzelkiem. Szklana butelka o poj. 10 ml

Zastosowanie:

- trudne do sklejenia elementy z PP (polypropylenu); PE (polyetylenu); POM (polyacetalu)

Producer: **Tamiya** (Japonia)

**〈HOW TO USE〉** Apply to both surfaces to be attached. Primer will dry quickly. Apply cement to one surface for easy attachment. ●For maximum effect, cement parts soon after primer has dried. ●Do not apply too much primer. This can lead to poor adhesion. ●Use on materials other than PP, PE and POM can cause brittleness. ●Excessive force or weight applied to cemented joint can cause breakage. ●Please also read instructions for CA cement. ★Do not use with brush-applied CA cement.

**〈CAUTION〉** Inhaling this product may be detrimental to health. Follow the handling cautions below when using. ●Do not use near open flames, sparks, static electricity, or other ignition sources. ●Ensure adequate ventilation during and after use. ●Contains organic solvents. Do not intentionally inhale. ●Wash hands and rinse mouth thoroughly after use. ●In case of fire, use CO<sub>2</sub>, foam, or powder extinguishers. ●Do not use for unspecified purposes.
